

Our learning from Autumn 1

Harvest Festival

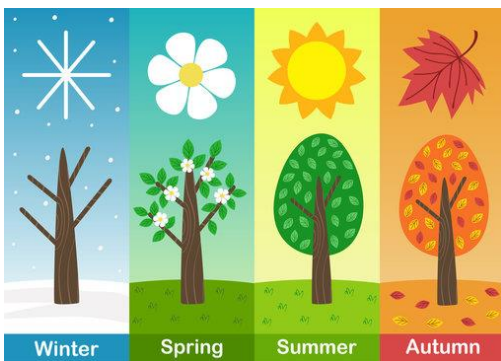

The children worked hard during the half term to learn the song 'Cauliflowers fluffy' ready to perform in our harvest festival service. I was very proud of the children when they performed in church especially since they had the added challenge of singing without music. The children also read out harvest prayers and readings in church. As part of our learning in English the children learnt about the importance of harvest festival and why it is celebrated.

Science- Seasonal change

In science the children learnt about the four seasons. The children were able to complete lots of outdoor learning looking for signs of autumn.

To go alongside our unit of work on seasonal change the children looked at the book 'The squirrel's busy year' in our English lessons. The children enjoyed thinking about the different seasons and how we change the activities we do and the clothes that we wear throughout the different seasons.

Geography- Local area

We started this unit of work by looking at where we live in England. We then zoomed in further to look at the county and the village that we live in. The children completed this unit by creating a leaflet showing the natural and manmade features of Langwith.
