

Our learning from Autumn 2

Remembrance

The children have loved learning about Remembrance this term. In history the children learnt about why we have Remembrance Day and how we celebrate it. In English the children learnt facts about the different colours of poppies and created some amazing acrostic poems. The children loved creating poppies to create a wreath for the classroom to show their respect.

DT

In DT the children were learning about freestanding structures. They learnt what a freestanding structure is and worked practically to learn how to make a freestanding structure strong and stable. The children were then able to design, create and evaluate their own freestanding structures using a range of materials. It was lovely to see the range of bridges that the children created.

Christmas

Christmas is always a busy time and all the children and staff have loved the variety of Christmas activities. The children have been working hard on our performance 'shine, star shine' and loved performing this to their family. In the last week of term the children had their Christmas party with a special visitor and plenty of party games. We finished the term with carols around the tree where each class was able to perform to their families.

Merry Christmas everyone!
